

WHAT WE DO

- ▲ On-Site High Voltage Management
- ▲ Substation Inspections, Maintenance and Repairs
- ▲ Lab analysis and diagnosis of high voltage insulating fluids
- ▲ Co-ordination, grounding, power quality, harmonic and load studies
- ▲ Thermography
- ▲ Commissioning of high voltage substations and associated switchgear
- ▲ Design and implement preventative/predictive maintenance programs
- ▲ Transformer and switchgear modifications, repairs and testing
- ▲ Retrofit low voltage breakers
- ▲ Troubleshooting
- ▲ Cable testing
- ▲ Ground Fault Protection
- ▲ PCB Management
- ▲ 24/7 Emergency service

OUR COMMITMENT TO YOU

- ▲ Dynamic corporate structure to effectively complete projects large or small, we treat all projects with the same dedication and commitment to excellence
- ▲ Fully qualified staff including Professional Engineers, Certified Engineering Technologists, Technicians and Support Staff
- ▲ Solid reputation earned through over 30 years of excellent service
- ▲ Wholly owned, independent, Canadian company
- ▲ We function as an unbiased testing authority, professionally independent of manufacturers, suppliers and installers of equipment
- ▲ Adherence to industry standards and practices
- ▲ Comprehensive range of test equipment
- ▲ Detailed reports and comprehensive recommendations
- ▲ Insurance coverage: General Liability, Environmental Impairment, Vehicle, Workers' Compensation

OUR APPROACH

▲ Since 1970, Rondar has been providing exceptional engineering support services to owners and operators of high voltage substation and power distribution systems in Canada. As new technology has been introduced, and higher efficiency systems installed, Rondar has consistently been at the forefront of electrical engineering and maintenance. Upgrades in power distribution equipment demand a thorough knowledge of new equipment and techniques. Rondar's trained engineering staff are dedicated to understanding a wide range of manufacturer's new products as they are introduced.

Our customers include many of the biggest names in transformer manufacturers, power distributors and generators, major power consumers, and electrical service companies. Some of our clients have been with us for 30 years or more, proof that Rondar's commitment to quality and service is a long term one. Our experience with legacy systems ensures that we can continue to service older systems. When a Rondar service team responds to your needs you know your power system, old or new, will receive professional attention.

We are proud of our accomplishments and commitment to our stakeholders. Our reputation depends on the performance of our staff to keep power distribution system and substation equipment operational and efficient. By helping to manage growth and cultivate an environment where our customers can prosper and achieve their goals, Rondar has become a success story in its own right.

With Rondar as a partner, you can power up with full confidence, keep downtime to a minimum and be assured that the highest standards of electrical maintenance are being delivered.

OUR KNOWLEDGE IS POWER
